

PROXY Pro 6 REACH. RESOLVE. REPAIR.

ALL-IN-ONE REMOTE SUPPORT SOFTWARE SOLUTION

PROXY Pro 6 Workstation Edition

Uses a peer-to-peer connection model to access remote computers in the corporate network. Ideal for SMBs and workgroups looking for fast, reliable, easy-to-use remote support tools.

PROXY Pro 6 Gateway Edition

Uses a hub-and-spoke network model to establish and maintain remote access connections inside and outside the network. Designed to simplify and automate administration, network access, and security in large, distributed corporate environments.

		Workstation Edition	Gateway Edition
General Features			
COMPONENTS			
PROXY Pro Host	Small software agent that runs on remote computers; fast and easy to install	✓	✓
PROXY Pro Master	Windows application that runs on helpdesk technician computers	✓	✓
PROXY Pro Gateway	Enterprise-class server for centralized administration, security, and network access		✓
PLATFORMS			
Supported Platforms	Windows Vista, Windows XP, Windows Server 2008, Windows Server 2003	✓	✓
OS Versions	Both 32- and 64-bit platforms supported	✓	✓
Legacy	PROXY Pro Master is fully interoperable with previous versions of PROXY Pro Host, which supports Windows 2000 and Windows NT	✓	✓
SUPPORT			
Maintenance & Support Contracts	M&S contracts guarantee free product and maintenance releases during your renewal period	✓	✓
Remote Access Features			
CONNECTION MANAGEMENT			
Polling	Discover all remote machines available for connections in your network	✓	✓
Centralized Directory	Organize large numbers of remote machines into logical groups, making them easier to find and manage		✓
Centralized Network Access-Point	Reach remote machines on the road or at home, even if they are behind foreign firewalls or NAT-devices		✓
Centralized Terminal Services	Make remote desktop connections to Windows and Citrix terminal services sessions on the terminal server instead of individual thin clients		✓
Always-on Service	Reach remote machines anytime, even if they are unattended	✓	✓
Next-gen Addressing	Find remote machines using IPv6 addresses or IPv6 tunneling over IPv4	✓	✓
Multi-homing	Support remote machines with multiple NIC cards or multiple IP addresses per NIC card	✓	✓
AUTHENTICATION			
Windows Authentication	Use strong authentication for Proxy users trying to reach remote machines inside the same domain	✓	✓
Shared-secret Authentication	Use proprietary Proxy authentication for Proxy users trying to reach remote machines outside the domain, on the road or at home		✓
Centralized SSL Authentication	Use SSL certificates for strongest possible authentication for Proxy users trying to reach remote computers inside or outside the domain		✓

NEW PROXY Pro 6 CAPABILITIES

- Terminal Services support
- Remote Management
- Hardware and software inventory reporting
- Enhanced, state-of-the-art 256-bit security
- Vista and Windows Server 2008 support
- Bandwidth Throttling
- Host-based Chat

SYSTEM REQUIREMENTS

PROXY Pro 6 is available on both 32- and 64-bit Windows Vista, Windows Server 2008, Windows XP, and Windows Sever 2003.

COMPATIBILITY

PROXY Pro 6 is fully compatible with previous versions of PROXY Pro, which support Windows 2000, Windows 98, and Windows NT.

Remote Access Features			
AUTHORIZATION			
Customizable Authorization	Create role-based access control policies based on fine-grained permissions (e.g. enable/disable input control, enable/disable file transfer, etc.) and apply to specific remote machines	✓	✓
Centralized Authorization	Create role-based access control policies and apply to a logical group or groups of remote machines		✓
Access Restrictions	Restrict access to remote machines by IP address, IP address range and/or time zone	✓	✓
Stealth Mode	Enable stealth mode access to remote machines by turning off audio (beep) and visual (popup, tray icon) notifications at connection time	✓	✓
ENCRYPTION			
Key Strength	Select encryption key strength ranging from 92- to 256-bits (default)	✓	✓
Algorithms	Select encryption algorithm, including RC4, Triple-DES, and state-of-the-art AES (default)	✓	✓
AUDITING			
Windows Event Log	Store details of connection-related activities in Windows Event Log of each remote computer	✓	✓
Centralized Audit Log	Store details of remote access, remote control and remote management activities for all remote computers in centralized audit log		✓
Remote Control Features			
REMOTE DESKTOP			
Remote Control	View and inject keyboard and mouse commands into remote desktop	✓	✓
Bandwidth Throttling	Optimize speed and responsiveness of remote desktop with bandwidth throttling options	✓	✓
Multi-Monitor Support	Capture remote desktop spread over multiple monitors	✓	✓
Headless Server Support	Generate remote desktop for headless servers with Proxy virtual video driver	✓	✓
View Only Mode	Suppress keyboard/mouse input on remote computer	✓	✓
Remote Clipboard	Exchange content with remote desktop using remote clipboard	✓	✓
Remote Printing	Redirect content from remote desktop to printer attached to local computer	✓	✓
Pause/Resume	Pause/resume screen capture of remote desktop	✓	✓
COLLABORATION			
Screen Sharing	Share remote desktop with and pass input control among two or more technicians		✓
Chat	Chat with end-user and/or other technicians sharing remote desktop	✓	✓
FILE TRANSFER			
Bulk File Transfer	Use drag-and-drop interface to transfer files or entire directories	✓	✓
Secure File Transfer	Guarantee privacy by transferring files or entire directories over SSL		✓
Resume	Resume large file transfers if connection is broken	✓	✓
SCREEN RECORDING			
Centralized Recording	Record one or more remote desktops concurrently, even if there is no active connection		✓
Playback	Play back Proxy screen recordings in PROXY Pro Master		✓
Conversion	Covert Proxy screen recordings to .wmv format		✓
Remote Management Features			
INVENTORY			
Hardware Manager	Generate inventory of hardware components on remote machines	✓	✓
Software Manager	Generate inventory of software applications on remote machines	✓	✓
CONFIGURATION MANAGEMENT			
System Manager	Access/modify system settings	✓	✓
Shared Resource Manager	View and modify configuration for shared folders and remote desktop sessions	✓	✓
Account Manager	List all users, groups and system accounts; force logoff of active user	✓	✓
Process Manager	List all processes; end selected processes	✓	✓
Service Manager	List all services; start/stop/restart services	✓	✓
Registry Manager	Add/modify/delete registry settings	✓	✓
Power Manager	Shutdown/reboot/log off machine	✓	✓
Event Manager	Access event logs at any time for list of recent activity	✓	✓
DEPLOYMENT			
Mass Deployment	Mass deploy Proxy to groups of remote computers silently and programmatically	✓	✓
Custom Install Package	Create and deploy Proxy install packages with custom settings	✓	✓
Scripting	Apply configuration changes via scripts and Proxy command line utility	✓	✓
